

Invitation to become a member of the Swiss FTD-network

Dear colleagues,

I am pleased to invite you to join the Swiss FTD-network. The Swiss FTD-network, founded in August 2020, aims to improve

- diagnostic procedures,
- pharmacological treatment, and
- non-pharmacological treatment and care of people affected by frontotemporal dementia (FTD) and FTD-related disorders in Switzerland by connecting and sharing information between professionals in the field.

Members of the network meet for a one-hour Zoom meeting in about 3-monthly intervals. Topics of the meetings range from case reports, overview lectures to clinical trials and research projects. The membership is free.

So far, more than 30 persons from the French-, German- and Italian-speaking parts of Switzerland joined the network including neurologists, neuropsychologists, neuroradiologists, psychiatrists and social workers.

To become a member of the Swiss FTD-network, please send an email to marc.sollberger@felixplatter.ch.

Kind regards,
Marc Sollberger
